Prepare a container to carry water

When receiving tap water at an emergency water supply center, you will need a container to carry the water. Each household should prepare emergency drinking water bags and drinking water tanks at home in case of a disaster.

Emergency drinking water bags

The bag can be folded up when not in use and placed in an emergency supplies bag. The backpack type is convenient because you can use both hands when carrying it.

The hand-held type can also be carried in the same way by placing it in a rucksack.

Drinking water tanks

Some of these are equipped with a convenient tap. They become heavy when filled with water, so think of a way to transport them to your home, for example by preparing a carrying cart or other means.

Generic medicines

ジェネリック医薬品を利用して
みませんか？

Generic medicines are medicines which are manufactured and sold at a low cost, but with the same active ingredients and quality as the original version of the medicine, once the patent for the original medicine has expired. The national government has approved the effectiveness and the safety of generic medicines as the same as the original versions of the medicines. By using generic medicines, you can save on the costs of medical treatment, and as a result, this leads to reduced pressures on health insurance tax payments.

You can obtain a sticker from the National Health Insurance and Pension Division to indicate that you wish to receive generic medicine. Affix it to your Health Insurance Certificate or your medicine handbook. Please note that the change to generic medicine is not compulsory.

Contact: National Health Insurance and Pension Division (Kokuho Nenkin-ka, 国保年金課), tel.: 082-420-0933.

Night-time and holiday hospitals

・ 夜間休日当番医
・
・

• **Night-time and holiday duty hospitals:** Full information about night-time and holiday duty hospitals within Higashihiroshima City is published in the Japanese-language version of the monthly city newsletter 'Higashihiroshima' (the page inside the back cover; only in Japanese), and on the Higashihiroshima City website (in Japanese and English). The information is subject to change at short notice, so before going to a medical facility, please be sure to call to confirm details.

Recently, there are more and more patients using emergency medical facilities at night and on holidays even though their situation is not serious. In some cases, these patients have prevented or delayed the treatment of patients with truly serious illnesses, and additionally, such cases are one of the reasons for doctors becoming overworked. Emergency medical facilities open at night and on holidays are for patients with serious, emergency conditions. Please try to visit the medical facility you use normally, during opening hours on weekdays.

• **Emergency medical treatment for children:** Please call the advice line on #8000 (if you cannot get through on this number, please call 082-505-1399). The service is available every day between 19:00 and 8:00 the following morning. You can obtain information about whether or not you should take your child to a medical facility outside of normal opening hours (at nights, on weekends or holidays, etc.).

• **If you have a medical problem at night or on weekends, and you are unsure about whether or not you should go to a medical facility:** Please call the Hiroshima area emergency consultation center on #7119. The service is free, and is available 24 hours a day, 365 days a year. The staff will be able to give you advice on whether to rest at home and see how symptoms develop, or whether you should go to a medical facility. If necessary, they can give you information about which facility to go to, or they can connect you directly to the 119 emergency service. In an emergency, do not hesitate to phone 119.
