## Do you know about Residents' Self-Government Councils?

• 住民自治協議会をご存知

エンロバロのはム

What are Residents' Self-Government Councils?

Residents' Self-Government Councils are organizations that represent local communities. They are comprised of individuals and of various groups such as Residents' Associations, and are based on elementary school enrolment areas (or in some cases, the enrolment areas of former elementary schools).

Residents' Self-Government Councils are now established in all 48 districts of the city, and, working with the city, they make efforts to deal with local problems and realize local goals.

What are Residents' Associations?

Residents' Associations are groups which link together residents in a neighborhood. In many areas, they are responsible for the following:

- Garbage stations (including the locations for disposing of oversized garbage)
- · Maintenance of roads and rivers

They are also an important part of Residents' Self-Government Councils.

It's important to work together as a community in cases such as the following:

If you want to find out local information:

Information about events and details about the local community are given out by Residents' Self-Government Councils and Residents' Associations, by means of notice boards and information passed from member to member.

If you want to use a garbage station:

Garbage stations are normally looked after by Residents' Associations and apartment management unions, etc. Please cooperate with the Residents' Association for the area in which you live.

If the road is dark and you want crime prevention lighting to be installed:

Requests for street lighting and improvement of roads are made to the City Office by Residents' Self-Government Councils and Residents' Associations.

### Night-time and holiday hospitals

#### Night-time and holiday duty hospitals:

Full information about night-time and holiday duty hospitals within Higashihiroshima City is published in the Japanese-language version of the monthly city newsletter 'Higashihiroshima' (the page inside the back cover; only in Japanese), and on the Higashihiroshima City website (in Japanese and English).

The information is subject to change at short notice, so before going to a medical facility, please be sure to call to confirm details.

Recently, there are more and more patients using emergency medical facilities at night and on holidays even though their situation is not serious. In some cases, these patients have

prevented or delayed the treatment of patients with truly serious illnesses, and additionally, such cases are one of the reasons for doctors becoming overworked. Emergency medical facilities open at night and on holidays are for patients with serious, emergency conditions. Please try to visit the medical facility you use normally, during opening hours on weekdays.

#### Emergency medical treatment for children:

Please call the advice line on #8000 (if you cannot get through on this number, please call 082-505-1399). The service is available every day between 19:00 and 8:00 the following morning. Also, advice is available on the website (you can access the website from the QR code to the right), in Japanese, English, and Chinese (simplified and traditional). You can obtain information about whether or not you should take your child to a medical facility outside of normal opening hours (at nights, on weekends or holidays, etc.).

## If you have a medical problem at night or on weekends, and you are unsure about whether or not you should go to a medical facility:

Please call the Hiroshima area emergency consultation center on #7119. The service is free, and is available 24 hours a day, 365 days a year. The staff will be able to give you advice on whether to rest at home and see how symptoms develop, or whether you should go to a medical facility. If necessary, they can give you information about which facility to go to, or they can connect you directly to the 119 emergency service.

In an emergency, do not hesitate to phone 119.
